Terms of Use for on:mint Verify

Last updated: November 2026

This English version is provided for convenience. In the event of any discrepancy, the German version prevails.

1. Scope

(1) These terms of use apply to the free use of on:mint Verify without an account, i.e., to the browser extension (listed in the Chrome Web Store as “on:mint Content Credentials”) and to the public verification pages on onmint.io and mintys.onmint.io. The provider is on:mint GmbH, Am Hamburger Bahnhof 4, 10557 Berlin, Germany, registered with the Local Court (Amtsgericht) of Charlottenburg under HRB 279347 B (“on:mint”), reachable at hello@onmint.io.

(2) By installing the extension or starting a check, the user accepts these terms. Customers with an account are subject to on:mint’s General Terms and Conditions.

2. Service

(1) Verify reads Content Credentials based on the standard of the Coalition for Content Provenance and Authenticity (C2PA) and invisible watermarks, displays provenance records from on:mint, and automatically analyzes media content such as images, videos, and documents to determine whether, and to what extent, it was generated or modified with artificial intelligence (AI).

(2) Use is free of charge. There is no entitlement to availability or to specific features; on:mint may change, restrict, or discontinue Verify at any time.

3. Significance of Results

Results of the AI analysis are statements of probability; incorrect assessments are possible in both directions. The absence of Content Credentials or watermarks does not mean that content is fake; they may have been removed during upload or editing. A provenance record proves neither that the information it contains is accurate nor that the content is lawful. Verify does not replace legal advice; users should not base important decisions on a result alone.

4. User Obligations

Users may use Verify only lawfully. In particular, it is not permitted to query Verify in an automated manner or in bulk, to attack Verify or circumvent its protective mechanisms, to decompile the software except as permitted by Section 69e of the German Copyright Act (UrhG), or to present modified results as results from on:mint.

5. Data Protection

For a check, Verify first transmits only a hash value (digital fingerprint) of the selected content to on:mint servers in the European Union, currently operated by Scaleway. Only if the comparison produces no match is the content itself transmitted; on:mint processes it only temporarily for the duration of the check and deletes it afterward. No transfer to third countries takes place. on:mint uses checked content, whether image, video, or document, exclusively for the check and in particular not for training AI models. on:mint processes personal data only to the extent required for the check; details are set out in the Privacy Policy.

6. Liability

Because use is free of charge, on:mint is liable only for intent and gross negligence and for fraudulently concealed defects. Liability for damages resulting from injury to life, body, or health and under the German Product Liability Act (ProdHaftG) remains unaffected.

7. Changes

on:mint may change these terms with effect for future use. The current version is available in the extension and on the verification pages; on:mint informs users of material changes in the extension.

8. Final Provisions

(1) German law applies. If the user is a consumer, the mandatory consumer protection provisions of the country of their habitual residence remain unaffected.

(2) on:mint is neither willing nor obligated to participate in dispute resolution proceedings before a consumer dispute resolution body.
